PROFESSIONAL SUMMARY

Senior software engineer with 6+ years building and scaling backend systems and leading engineering teams. Deep experience in high-performance API design (NestJS, FastAPI, GraphQL), multi-tenant data architecture, and end-to-end AWS DevOps. Cut API p95 latency 60%+, architected a siloed multi-provider B2B platform, and own CI/CD across 20+ production projects. Comfortable across the stack with Angular and React Native; obsessive about performance and data consistency.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, PHP, Java, SQL

Backend & APIs: NestJS, Node.js, FastAPI, Flask, Laravel, Ruby on Rails, GraphQL, REST, microservices, multi-tenant architecture, GraphQL Subscriptions

Frontend: Angular, React Native, Redux, Recoil

Databases & Caching: PostgreSQL, MySQL, Redis (queues), schema design, indexing, denormalization, large-dataset optimization

Cloud & DevOps: AWS (EC2, S3, CloudFront, Route 53), CI/CD pipelines, Nginx, Cloudflare, CDN, HTTP/2, Git

Practices: API optimization, web security (Mozilla Observatory), performance (Lighthouse), HIPAA compliance, automated testing (Selenium), Agile, team leadership & mentoring

PROFESSIONAL EXPERIENCE

Engineering Lead

Jan 2024 – Present

Midwest Global Marketing & Billing LLC · USA (Remote)

- Lead a team of 5 engineers architecting the core B2B platform; designed a siloed table-per-provider database for strict data isolation, then a unified search service with a denormalized index for sub-second search.
- Engineered zero-downtime synchronization and backfill pipelines reconciling siloed provider databases into unified search, analytics, and commission engines, guaranteeing cross-platform data consistency.
- Reduced API p95 latency by 60%+ by offloading blocking I/O to a Redis-backed queue; added real-time updates via GraphQL Subscriptions.
- Established security & performance standards - 90+ Lighthouse and Mozilla Observatory A grade across 20+ sites.
- Own DevOps end to end: custom CI/CD pipelines on AWS for 20+ projects, Nginx, Route 53, S3/CORS, CloudFront CDN.

Software Developer

Sep 2021 – Dec 2023

Midwest Global Marketing & Billing LLC · USA (Remote)

- Optimized internetoffersnow.com (Flask) for Core Web Vitals - implemented HTTP/2, CloudFront CDN, and Cloudflare, and automated asset builds with direct CloudFront uploads.
- Sanitized and indexed a 100M-row US census dataset for efficient zip-to-provider lookups.
- Built secure healthcare APIs for healthtigo.com with FastAPI in partnership with BillingFreedom, ensuring HIPAA compliance and clean platform integration.

Software Developer

Jan 2019 – Jul 2021

NMDigital · Lahore, Pakistan

- Built authorized-retailer sales portals for US telecom infrastructure clients including WOW (Wide Open West).
- Implemented credit-check, payment, and queued bulk installation-availability & address-check APIs.
- Delivered Laravel backend features and cross-platform mobile in React Native (TypeScript) with Redux/Recoil.

Software Developer (Remote)

Oct 2019 – Mar 2021

Stalwart Integrals · Chandigarh, India

- Core backend on artbuy.com (Ruby on Rails / Sharetribe): built the database backbone, user authentication, comment system, and an internal admin file manager.

Senior Sales Executive

Jan 2018 – Dec 2018

Digital Globe Services Inc. · Lahore, Pakistan

- Managed US clients for bulk internet and home-security deals across Frontier, AT&T, Vivint, Spectrum, Cox, and ADT - domain knowledge that informs my current telecom-provider work.

QA Intern

May 2017 – Dec 2017

Softtronix · Lahore, Pakistan

- Wrote automated UI tests with Selenium WebDriver (Java) for FirstShipping and Archivist.

EDUCATION

BS (Hons.) Computer Science – Forman Christian College (FCCU), Lahore, Pakistan

O Levels & A Levels – Sadiq Public School, Bahawalpur · 6 A's (O Level), 2 A's (A Level)
